

IT Health Check

How does it work?

- Book an IT Health Check
- We conduct a thorough analysis of your IT environment
- You receive a detailed report with an action plan

☰ *One-time cost with no recurring fees.*

What do you get from the report?

- ✓ Clear improvement suggestions
- ✓ Identification of security vulnerabilities
- ✓ Cost optimization
- ✓ Better operations and stability
- ✓ Flexibility – the analysis can be adapted to the entire IT environment or just the client environment.

Why is an IT Health Check needed?

We analyze the IT environment – including networks, hardware, client environment, software, and security – as well as Microsoft 365, Active Directory, and Entra ID to identify risks and areas for improvement.

The result is an action plan with concrete recommendations for enhanced security, stability, and cost efficiency

What is included in the IT Health Check

- Comprehensive IT inventory – networks, hardware, client environment, software, and security.
- Microsoft 365 analysis – licenses, security policies, user management.
- Active Directory and Entra ID review – roles, authentication, security configurations.
- Identification of risks and areas for improvement.
- Action plan with concrete improvement suggestions.
- Opportunity for continued operations and support for a secure IT environment.
